

Mohamed Teama

Full Stack Developer | React.js · Node.js · Next.js · MERN Stack

mohammed.teama789@gmail.com | +201551393492 | Nasr City, Cairo, Egypt | [linkedin.com/in/mohamed-teama-software](https://www.linkedin.com/in/mohamed-teama-software)

GitHub: github.com/MohamedATeama

Summary

Full Stack Developer specialized in building scalable web applications using React.js and Node.js. Experienced in designing RESTful APIs, authentication systems (JWT), and database-driven applications using MongoDB. Built production-style projects with real-world architecture including user authentication, API integration, and responsive UI design. Focused on clean code, performance, and backend scalability.

Professional Experience

Freelance Full-Stack Developer

2025 – Present

- Designed and developed **scalable full-stack web applications** using MERN stack (MongoDB, Express.js, React, Node.js).
- Built secure **RESTful APIs** with authentication and role-based access control using **JWT and OAuth**.
- Designed optimized **MongoDB database schemas and indexing strategies**, improving query performance and scalability.
- Deployed cloud applications using **AWS and Vercel**, implementing production-ready backend infrastructure.
- Integrated third-party services and APIs to enable authentication, real-time features, and cloud storage.
- Collaborated with clients to design software architectures and deliver maintainable production-grade systems.

Education

Bachelor's Degree in Computer Science,

10/2021 – 07/2025

Faculty of Computers and Information — Menoufia University

Projects

Roof Planting — AI & AR Rooftop Gardening Platform

Tech: MERN Stack, FastAPI, PyTorch, MongoDBArchitected and developed a full-stack AI-powered platform for rooftop garden planning and plant disease detection. Built scalable RESTful APIs using Node.js with secure authentication and role-based access control. Integrated PyTorch machine learning models through FastAPI microservices to enable plant classification and disease detection. Designed efficient MongoDB data models with indexing strategies to handle plant and user datasets, and implemented communication between microservices and the main backend to support a scalable system architecture.

Gmate — Full-Stack Scalable Platform (User + Admin System), Live Demo: <https://gmate-frontend.vercel.app>

Tech: Node.js, Express.js, MongoDB, React.js, Next.js, REST APIs, JWT, RBACDesigned and developed a full-stack platform featuring a user-facing application and an admin management dashboard. Built scalable RESTful APIs using Node.js and Express.js to handle core business logic, and implemented secure authentication and authorization using JWT and role-based access control. Developed admin functionalities for managing users and system operations, while designing optimized MongoDB schemas for efficient and scalable data access. Structured the backend using modular and service-based architecture patterns and integrated multiple frontend clients with a centralized API to ensure consistent and efficient data flow.

Wild Oasis — Full-Stack Hotel Management & Booking Platform, Live Demo: <https://the-wild-oasis-website-mt.vercel.app>

Tech: Next.js, React.js, Supabase, TanStack Query, Tailwind CSS, RechartsDeveloped a full-stack hotel platform that includes a customer booking website and an admin management dashboard. Built a server-side rendered booking system using Next.js to enhance performance and SEO, and implemented secure authentication using Google OAuth alongside role-based access control. Designed reservation and availability logic with real-time updates powered by Supabase, and developed admin tools for managing bookings, cabins, and guest data. Optimized server state management using TanStack Query with caching and synchronization, and created interactive analytics dashboards to visualize booking trends and occupancy metrics.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, SQL

Frontend Development: React.js, Next.js, React Native, Redux Toolkit, TanStack Query, HTML5, CSS3, Tailwind CSS, Sass, Bootstrap

Backend Development: Node.js, Express.js, GraphQL, REST API Development, MVC Architecture, JWT Authentication, OAuth, Socket.io

Databases: MongoDB, Mongoose, MySQL, Sequelize, Redis

Testing: Jest, API Testing, Unit Testing, Integration Testing, Postman

Cloud & Tools: AWS (S3, EC2, Amplify, Elastic Beanstalk), Docker, Git, Supabase

Certifications

Open Source Applications Developer, National Telecommunication Institute

01/2026 – 04/2026

Completed intensive full-stack training covering frontend (React, Next.js), backend (Node.js, Express), and databases (MongoDB, SQL). Built scalable RESTful APIs, implemented authentication (JWT, OAuth), and developed real-time and cloud-based applications. Gained hands-on experience with Docker, testing, and deployment on AWS and Vercel.

Web development Diploma, Information Technology Institute

08/2024 – 10/2024

Advanced React patterns, state management (Redux Toolkit), performance optimization, and API integration.

Back-end Web Development Diploma, SEF Academy

04/2024 – 07/2024

RESTful API development, MongoDB schema design, MVC architecture, JWT authentication.

Front-end Web Development Diploma, SEF Academy

11/2023 – 03/2024

Responsive UI development using HTML5, CSS3, JavaScript, and React.js.

Languages

Arabic — Native

English — Professional Proficiency
